

Dump Caddy

US Pat. 8,469,049; CA Pat. 2,723,098

Model 28802 Boxed w/ hardware

The Dump Caddy makes an unsavory task a little more desirable. The Dump Caddy allows you to store your waste hose in an enclosed carrier on the frame rail away from your storage compartment eliminating a potential smelly and nasty mess. When you need to use your waste hose, the Dump Caddy swings into position and telescopes out into place for an easy setup. It offers 10 ft of extension tubes to support the hose and protect it from sun bake and damage. Once finished simply store back on the frame for a concealed, out of the way look.

- Innovative 2-in-1 product for convenient use
- Storage carrier to keep messy waste hose contained
- No need to squeeze into bumper or storage compartment
- Telescoping tubes support & protect hose while in use (10 ft extension)
- Easy installation for permanent frame mount for easy access
- Swivels on pivot bracket for 180 degree directional movement
- Hose can be easily replaced if needed
- Made in the USA

Retract-A-Spare

Model 28240 Boxed w/ hardware

BAL introduces another innovative, space saving product: The Retract-A-Spare Tire Carrier. Allowing you to store your spare tire under your trailer and off the rear bumper, its universal, telescoping design offers mounting on almost all travel trailers, 5th wheels, and motorized RVs. In the unfortunate event that you need your spare tire, simply hand crank the spare to the ground utilizing its cable retraction system. Simple installation and easy operation.

- Telescopic design fits frame widths of 52" to 72"
- Mounts under frame rails for better location versatility
- Multiple cable spools spread cable out eliminating coil memorization
- E-Coated for superior rust-inhibitive finish
- Made in the USA with a Two-Year Limited Warranty
- Drilling through frame rail & carrier channel required
- Up to 16.5" wheel and tire
- Mounting hardware included

APPLICATION

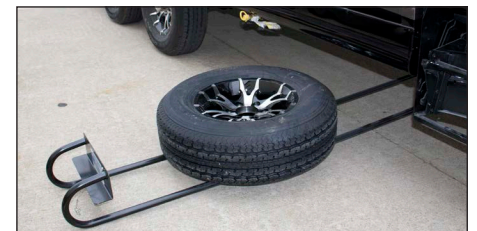

Hide-A-Spare

Model 28217 (B) 70" frame width, Recessed mount for trailers without underbelly enclosure

Model 28218 (B) 70" frame width, Underslung mount for trailers with enclosed underbelly

Rear bumper spare tire mounts are cumbersome and ugly and they make it difficult to install bike racks and cargo trays. Plus they add weight and length to your travel trailer. BAL now offers the 'Hide-A-Spare' Tire Storage System that allows you to mount the bulky tire beneath your trailer and out of the way. This system is very easy to mount and if you ever require access to the spare tire, simple to remove. With five models to fit most types of trailer frames, installation is quick and simple. Two plates mount the carrier to the frame and the knob and pin are removed to lower the 'Hide-a-Spare' to the ground. It then telescopes out for easier access to the spare tire. Made in the USA. Not retail boxed. Limited One-Year Warranty.
